Everything that has been done is with the TEAM

The BoO colleagues / HQ

Nikos Papadopoulos, Cezmi Akdis, Antonella Muraro, Victoria Cardona, Luis Delgado, Roy Gerth van Wijk
Secretary General’s Report
Steadily increasing membership
New Society Members

• Irish Association of Allergy and Immunology
• Indian College of Allergy Asthma and Applied Immunology
Interest Group developments

- First year: Allied Health, Ocular Allergy
- New: Epidemiology
- Representation in JMA
New Boards - Elections

• 5 Sections, 12 Interest Groups, JMA
• New Boards consist of up to 7 members: Chair and Secretary are elected by the Board
• 111 new Board members, elected directly by the membership
Congressess

• Continuing success in Istanbul
  – 2012 Geneva
  – 2013 Milan

• Further development of Focused Meetings: PAAM, DHM, ISMA, SAM, Asthma, Rhinitis, FAAM

Vice President:
Cezmi Akdis
Education

- Allergy Schools: summer and winter
- Increasing number and impact of Task forces and Position papers
- Knowledge Examination

Vice President: Luis Delgado
Communication

• Increasing impact on the internet
  – New websites, social media presence
• High impact Journals, new publications
• Public Campaigns: immunotherapy

Vice President:
Victoria Cardona

4th International Symposium on Molecular Allergology
29 – 31 October 2010 • Munich, Germany

Highlights
- Novel concepts in molecular allergology
- Structural and functional biology of allergens
- Changing gears: allergenic molecules for allergy diagnosis
- Allergenic molecules from special sources
- Indoor and outdoor allergen measurements
- Immunomonitoring of allergen-specific immunotherapy with allergenic molecules
- Improving allergen-specific immunotherapy with allergenic molecules
- Genetics of allergic diseases
- Animal models of allergic diseases
- Diagnostic and therapeutic use of allergenic molecules in food allergy

Allergy Today: A Public Health Threat of Pandemic Proportions

The rapid increase of allergies during recent times

Trends in prevalence of asthma

- High prevalence country
- Intermediate prevalence country
- Low prevalence country
The Impact of Allergy on the Quality of Life of Europeans

If not properly controlled, the increasing cost of allergies may prove detrimental to public health economics in Europe.

High/increasing cost of allergies

Estimated cost of care for asthma in Europe

The total cost of care for asthma amounts to €17.7 billion. As a chronic disease which is often difficult to control, asthma is responsible for significant work impairment, while more than half of the costs that the disease imposes on society represent lost work days.
What Can Allergen Immunotherapy Achieve

Long-term effects of immunotherapy

Children receiving immunotherapy for hay fever develop considerably less asthma 10 years later, in comparison with children that do not (control), supporting the effectiveness of immunotherapy in preventing progression of allergies to more severe forms. Allergy 2007.21.
Call for Action

- Promoting allergen immunotherapy awareness
- Update national healthcare policies to support allergen immunotherapy
- Prioritise funding for immunotherapy research
- Monitor the macroeconomic and health economic parameters of allergy
- Streamline medical disciplines and specialties
Call to EAACI National Societies and members

- Promote
- Optimize dissemination
- Become an ambassador of immunotherapy in your national community

Report of the mandatory auditors
to the management of

European Academy of Allergology and Clinical Immunology

As mandatory auditors, we have audited the financial statements (balance sheet and income statement) of European Academy of Allergology and Clinical Immunology for the year ended 31 December 2010.

These financial statements (balance sheet and income statement) are the responsibility of the board of directors.

Our responsibility is to express an opinion on these financial statements based on our audit. Our audit was conducted in accordance with auditing standards promulgated by the Swiss profession, which require that an audit be planned and performed to obtain reasonable assurance about whether the financial statements are free from material misstatement. We have examined on a test basis evidence supporting the amounts and disclosures in the financial statements. We have also assessed the accounting principles used, significant estimates made and the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the accounting records and financial statements (balance sheet and income statement) comply with Swiss law.

How?

a) Extensive and efficient communication of the science and novel developments in the field of allergy, asthma and immunology to the rest of the world by organization of beautiful annual meetings, focused meetings, schools; through our scientific journals, newsletter, website, press releases, and focused communication campaigns.

b) Strengthening of our specialty.

c) Increasing membership together with increasing involvement of the members in decisions with full member satisfaction.

d) Professionalization of our Academy in a steady way on solid grounds.

SAM Skin Allergy Meeting, December 2012
1) To bring in an increasing number of participants and sponsors to the EAACI events and provide them with entire satisfaction. We will continue to improve the EAACI meetings as top international events in allergology and clinical immunology for every individual and stakeholder interested in the field worldwide. We will understand allergies as a worldwide problem; engage into discussion/communication with all organizations in the field worldwide, and provide them the best science and communication platform.

2) Best scientific programme will be brought together by full involvement of individual members, sections, interest groups, and local flavour. As much as possible scientists will be embraced by and engaged to our congresses.

3) Young scientists, developing group leaders and JMA will be supported to develop future opinion leaders in the field.

4) Best social programme will be organized to improve personal as well as transcultural communication.

5) A healthy economy and budget of all of the events and other means of fund-raising will be sought and implemented.

6) Membership, participant and sponsor satisfaction will be continuously measured.

7) The educational aspect of the annual congresses and focused meetings will receive utmost attention.

**Position paper**

**EAACI/GA\^2LEN Position paper: Present status of the atopic eczema**

**Title:** The management of anaphylaxis in childhood: position paper of the European academy of allergology and clinical immunology

**Introduction**

Anaphylaxis is a clinical emergency and all physicians caring for children should be familiar with its management. This position paper has been prepared by the EAACI Taskforce on Anaphylaxis in Children to enable healthcare professionals and parents or caregivers of children with anaphylaxis to recognize the clinical picture and to implement an appropriate management plan when it occurs.

**Definition**

Anaphylaxis has been defined as a severe, rapid-onset systemic hypersensitivity reaction, typically caused by allergen exposure, that may involve multiple organ systems (1). The diagnosis of anaphylaxis is made when there is a history of an allergic reaction to a specific allergen and a clinical syndrome consistent with anaphylaxis is present. Anaphylaxis can result in life-threatening outcomes, and prompt recognition and management are essential to prevent serious complications.

**Position paper**

**Eczematous reactions to food in atopic eczema: position paper of the EAACI and GA\^2LEN**

**Title:** Food allergy and atopic eczema (AE) may co-exist in the same patient. Besides typical immediate (type I) reactions (e.g., anaphylaxis) which are observed in patients suffering from AE, it is clear that foods, such as cow’s milk and eggs, are direct provokers of AE, particularly in sensitized infants. In general, allergic reactions and food-related reactions are of greater importance in older children, adolescents and adults. Clinical studies have revealed that more than 50% of allergic children with AE can be challenged with certain foods that can induce an AE response. The sensitization to these foods can result in reactivity to the allergens in these foods, particularly in children with AE who react to foods. Reactions to food allergens, such as cow’s milk and eggs, can also react to foods. Reactions to food allergens, such as cow’s milk and eggs, can also react to foods. Reactions to food allergens, such as cow’s milk and eggs, can also react to foods. Reactions to food allergens, such as cow’s milk and eggs, can also react to foods. Reactions to food allergens, such as cow’s milk and eggs, can also react to foods.
8) We will continue to organise **3-4 Allergy Schools per year**, which will focus on specific areas of allergy and immunology. All of the School activities will be sponsored by our Academy with the only aim of education.

9) We will develop comprehensive educational material in allergy and immunology, in print or to be available on our web-site.

10) Dissemination of **EAACI Knowledge Examination** will be a special focus. We will aim at continuing to support the increased number of participants that will take the knowledge examination.

11) We will increase the **collaboration with UEMS** (Union Européenne des médecins spécialistes/ European union of medical specialists) to develop a simplified and more efficient way of establishing Continuing Medical Education (CME)-granting scientific and educational events. The development of a Europe-wide curriculum for education in allergology will be pursued.

12) EAACI is committed to **support the development of the specialty** of allergology in Europe by providing a platform for clinical and scientific communication (Allergy Schools and the EAACI Congresses); providing a platform for efficient allocation of CME-credits to courses; providing support for national societies needing to develop the specialty of allergology in their country.

13) EAACI shall provide administrative and financial support for the **development of task forces** for guidelines, position papers and consensus reports and provide the best scientific platform to communicate the outcome of the task forces through our meetings and journals.

14) EAACI will be focused to **embrace and educate family physicians and general practitioners**, who are interested in allergic patient care and education. Our new JMA mentorship program will be established on solid grounds so that our EAACI culture of good science and education disseminates to the whole Europe and further to the rest of the World.

15) EAACI will be focused on the **development of new interest groups** according to the needs of our community such as epidemiology of allergy and asthma, biologicals, pharmacoconomics etc.

EAACI Thematic Month on Pediatrics Section

This month EAACI Thematic Month focuses on Pediatrics Section. The priorities of the EAACI Pediatrics Section Board are enhancing the visibility of EAACI as a leading scientific society in Europe, increasing membership and to establish and improve educational activities in Pediatric allergology at all levels. For these purposes, the Board has initiated collaborations with European General Pediatrician, Primary Care and Emergency Physician Societies. All Board members are committed to a team working to achieve these goals. One of the aims of the Pediatrics Section is to use the best resources for the Continued Education of Pediatric Allergy specialists, and to deliver an excellent standard of care for allergic children across Europe.

3rd EAACI / UEMS Knowledge Examination

The EAACI provides a European Examination for Allergology and Clinical Immunology. It will take place for the third time at the EAACI meeting 2010 in London (June 5th). The Examination / Knowledge Test takes place every year during the EAACI Congress. Although it does not replace or substitute the currently existing national examinations that are regularly held by national bodies, it helps to further increase the standard of allergology/clinical Immunology in Europe, and facilitate exchange of young people trained in Allergology and Clinical Immunology in Europe. Applications are open from 01 February to 01 April 2010.

Scientific Programme Committee Coordinator

EAACI is seeking a qualified individual for the position of Scientific Programme Committee (SPC) Coordinator for the next 2 years term. The EAACI SPC is responsible for assembling the Scientific Program for the EAACI Annual Congresses, currently the largest Allergy Congress worldwide. The SPC involves several EAACI Officers and representatives of all sections and interest groups and is chaired by the SPC Coordinator. The SPC Coordinator is responsible for organisation and chairing of 3-4 SPC meetings, monthly teleconferences and ~1200 e-mails per year, compiling the first and second Congress announcements, finalising the

16) Allergic diseases are a growing health problem world-wide. At the same time the knowledge of the opportunities to prevent and treat allergies is limited among politicians, policy makers, patients, public and even many health care professionals outside the allergy specialty. **A five years communication strategy** will be developed to reach and fulfill the needs of all these stakeholders.

17) The EAACI Journals Allergy, Pediatric Allergy and Immunology (PAI) and Clinical and Translational Allergy (CTA) shall further develop as strong key journals in the field of allergy asthma and clinical immunology. Strong collaboration between the journals and other EAACI bodies will be established.

18) The EAACI web-site shall be the most comprehensive, updated and interactive platform of allergy news for allergy specialists, lay people, medical students, patients and industry with the latest sources of information. **Other e-platforms** such as The Allergy News (our news portal) or Infoallergy (the EAACI public website) shall continue to grow in their function to inform professionals and general population in the field of allergy.

19) Major areas of allergy will be supported with **EAACI public campaigns**, each of which will be launched every year.

20) A **five years membership strategy** plan will be developed.

21) **Member satisfaction** will be continuously measured. Internal information of activities within EAACI shall be increased in order to pursue membership involvement and satisfaction. The Newsletter and other online tools will be used for this purpose.
What is the best investment in the Universe?
Active JMA group

- JMA fee is free: Allergy/PAI and Newsletter on-line
- EAACI/GA2LEN fellowships
- Clinical fellowships
- Summer and winter schools
- Educational symposia
- Travel grants
- JMA posters
- JMA Forum

Mentorship program
Fellowship Awards 2011

Exchange Research Fellowship Award

Long Term
- Vladimir Andrey Giménez Rivera
- Agnieszka Wągryzyn

Medium Term
- Pegah Toyourpour

Short Term
- Corina Bocian
- Liahgova Bhattar
- Akaterini Chatzakaki
- Mariana Couto
- Roman Pichulik
- Katharina Martz
- Brinda Subbarayal
- Felix Weber

Clinical Fellowship Award

- Anca Minea Chiriac
- Catalina Dumitru
- Jenni Hjortland
- Lina Jerkauskaiute
- Alexandros Sakellariou
- Diana Pereira da Silva

22) A five years **fundraising strategy** will be developed that can allow EAACI to keep its financial strength and independency.

23) Our Academy has a long-term history of a respectful **collaboration** with its “Founder Sponsors”. The support received has been primarily focused on annual meetings. This collaboration will be further developed, supporting scientific communication by developing strategic partnerships with different pharmaceutical companies.

24) The existing **healthy, transparent and professional way of bookkeeping** will be further improved with the application of standard operating procedures for newly developing areas.
International Outreach Strategy
25) Our strong relationships with organisations such as GA2LEN, GARD and relevant societies such as the American Academy of Allergy, Asthma, Immunology (AAAAI) and World Allergy Organization (WAO) are central for EAACI and these relationships will be strengthened.

26) Other partnerships will be pursued in particular associations with organisations in adjacent areas to EAACI. Special attention will be given to relationships with regulators and especially at the EU-level.

27) EAACI will work on establishing new collaborations with different external bodies, such as companies in the field of allergy, and other funding entities such as different foundations.

28) The EAACI collaboration with WAO will actively continue, as EAACI and WAO are organising the EAACI/WAO Congress in **2013 together in Milan**. A scientific programme committee and procedures for developing the programme are being established. We together with WAO are committed to provide an exciting and very attractive congress for the whole World.

29) The EAACI collaboration with AAAAI has primarily been focused on the PRACTALL, “Practical Allergology” program to develop transatlantic position papers in specific fields. EAACI is committed to continue this program with at least one PRACTALL per year.

30) EAACI is focused to work with patient organisations and establish a patient organization committee or an interest group.
Democratization of our Academy & Gender balance
31) EAACI shall continue for **open and transparent elections** for more than 140 positions in the EAACI family. This is currently being implemented by web-based electronic voting for Section and Interest Group Boards.

32) EAACI shall focus on keeping **gender balance** and **regional balance** in its committees, sections and interest groups.

33) EAACI shall be fully committed to keep **very high ethical standards and transparency** in all its activities. The ethics committee will develop new documents according to the needs of the academy due to new activities.
