DHM 2018 - Poster Prize Winners

Chuang-Wei Wang, Taiwan
Abstract: The function of HLA-B*13:01 involved in the pathomechanism of dapsone-induced severe cutaneous adverse reactions

Theresa Fachruddin, Switzerland
Abstract: Cyto-LTT: A sensitive tool for the diagnosis of delayed-type drug hypersensitivity

Axel Patrice Villani, France
Abstract: Massive expansion of drug-specific, Clonotypic And Polycytotoxic CD8+ T cells In toxic epidermal necrolysis

José Antonio Cornejo-Garcia, Spain
Abstract: Genetic variants in COX-1 And COX-2 encoding genes in nonsteroidal anti-inflammatory drug-induced urticaria/angioedema

Catarina Coutinho, Portugal
Abstract: Hypersensitivity reactions to nonsteroidal anti-inflammatory drugs by inhibition of the Cyclooxygenase- 1 – 12 years experience

DHM 2018 - Travel Grant Winners

Rami Bechara, France
Abstract: Characterization of Penicillin-Specific Naïve CD8+ T cells: from extracellular to intracellular protein haptenation

Alejandra Monroy Arreola, Mexico
Abstract: MicroRNAs associated with T Cell activation are up-regulated in plasma exosomes in severe cutaneous reactions

James C Waddington, United Kingdom
Abstract: Characterization of the HLA-B*57:01 immunopeptidome in the presence of Flucloxacillin

Arun Tailor, United Kingdom
Abstract: Nitroso sulfamethoxazole forms multiple haptenic determinants with cysteine, Lysine and Tyrosine

Antonia Bünter, Switzerland
Abstract: Chlorhexidine allergy: In Vitro data predict a good tolerability to Alexidine

Andrew Gibson, United Kingdom
Abstract: Reduction of the drug-specific T-Cell response during desensitisation in patients with non-immediate piperacillin hypersensitivity reactions
Paul James Thomson, United Kingdom
Abstract: Modifications of the Cyclopropyl Moiety of Abacavir provides an insight into the relationship between the drug interaction within the HLA-B*57:01 antigen binding cleft and T-cell activation

Benjamin Paul Cochran, United States
Abstract: Inpatient Penicillin allergy evaluation safely increases utilization of Beta Lactams

Ekaterina Khaleva, Russia
Abstract: Characteristics of perioperative anaphylaxis in children

Tiago Rama, Portugal
Abstract: Mastocytosis: NSAIDs are safer than previously thought
