Lapse date: 21.1.2014

0022/2013

**Written declaration, under Rule 123 of Parliament's Rules of Procedure, on recognising the burden of allergic disease<sup>1</sup>**

1. More than 150 million EU citizens suffer from chronic allergic diseases, half of whom are undiagnosed due to a lack of awareness and shortage of medical specialists;
2. More than 100 million Europeans suffer from allergic rhinitis and 70 million from asthma, the most common non-communicable diseases in children and the main cause of children's emergency room visits and hospital admissions;
3. More than 17 million Europeans suffer from food allergies or severe allergies implying a risk of acute attacks or anaphylaxis with life-threatening potential;
4. Allergies are an underestimated cause of unhealthy ageing and have a severe impact on social, professional and educational performance, especially in children, causing socioeconomic inequalities;
5. The Commission is therefore called upon to encourage cooperation and coordination between Member States to promote: national allergy programmes to reduce the disease burden and health inequalities; training in allergies and multidisciplinary care plans to improve disease management; use of preventive and tolerance-inducing approaches to allergy treatment; and scientific research into direct and indirect allergy risk factors, including pollution;
6. This declaration, together with the names of the signatories, is forwarded to the Commission.

---

<sup>1</sup> In accordance with Rule 123(4) and (5) of Parliament's Rules of Procedure, when the declaration is signed by a majority of Parliament's component Members, it shall be published in the minutes with the names of its signatories and forwarded to the addressees, without however binding Parliament.
